

Palliative Care

Service users with advanced progressive illnesses are offered the active holistic care called Palliative Care. This Palliative Care training course covers the management of symptoms and pain, as well as the provision of social, psychological and spiritual support that is paramount.

Programme/Course Content:

- The life death cycle
- Management of pain
- Skin care
- Mouth care
- Communication
- Common symptoms
- Psychological aspects of care
- Spiritual aspects of care
- Service user support
- The last hours of life
- Family support during illness and in bereavement
- Dealing with own feelings
- Summary and evaluation

Aimed at: Care and nursing staff

Accreditation: If you require additional accreditation or distance learning course options then please consider the following courses:

- End of Life Awareness
- End of Life Care
- Palliative Care

Further information: Bespoke Courses

For qualified or experienced staff the course can be extended to 2 days to allow Palliative Care to be explored in greater depth including greater understanding of pain control and common treatments.

The extended course is highly interactive allowing delegates to discuss their experiences and concerns in a shared group setting.
