

## HEALTH AND SAFETY

### Risk Assessment Level 2 QCF

This Risk Assessment Level 2 QCF training course has been designed to communicate the importance and mechanics of maintaining a safer working environment. This responsibility should be shared between every worker across the board.

#### Programme/Course Content:

- Main causes of accidents and ill health, and their implications for people in the workplace
- Legal requirements for risk assessment
- Principles of risk assessment training including:
  - Hazards, risks and control measures
  - The five steps of risk assessment
  - The hierarchy of control
- Risk assessment review and record keeping

**Aimed at:** All employees, though more specifically those in a position of responsibility

**Accreditation:** OFQUAL
